“As a firm with 2 offices, we had to ensure we implemented a high end case management solution with a reliable, easy to use search provider to achieve business efficiencies. Previous solutions have always raised issues which is why we are delighted with the solutions provided by LEAP and InfoTrack.

Features such as the ability to drag and drop documents and the pre-population of data is already adding value as with less need to rekey, we can work faster with less errors. The service has been fantastic and I would highly recommend it to other conveyancing professionals.”
